Contents of Volume 57

Volume 57, Number 1, March 15, 1974

AUTHOR INDEX. Volume 57, Number 1 ii

FREDERICK E. BROT, JANET H. GLASER, KENNETH J. ROOZEN, and WILLIAM S. SLY. *In Vitro* Correction of Deficient Human Fibroblasts by β-Glucuronidase from Different Human Sources 1

N. D. DENSLOW and T. W. O'BRIEN. Susceptibility of 55S Mitochondrial Ribosomes to Antibiotics Inhibitory to Prokaryotic Ribosomes, Lincomycin, Chloramphenicol and PA114A 9

JÚLIUS ŠUBIK, MIROSLAV BEHÚN, and VLADIMIR MUSILEK. Antibiotic Mucidin, A New Antimycin A-Like Inhibitor of Electron Transport in Rat Liver Mitochondria 17

STEPHEN M. BOYLE and BRUCE H. SELLS. Activity of Polypeptide Chain Initiation Factors during a Nutritional Shift-Up in *Escherichia coli* 23

URSULA STORB. Evidence for Multiple Immunoglobulin Genes 31

MIHO TAKAHASHI, TUSN T. WANG and THEO HOFMANN. Acyl Intermediates in Pepsin and Penicillopsin Catalyzed Reactions 39

LLOYD A. SCHICK and FRANCIS J. CASTELLINO. Direct Evidence for the Generation of an Active Site in the Plasminogen Moiety of the Streptokinase-Human Plasminogen Activator Complex 47

SCOT HICKMAN, LARRY J. SHAPIRO, and ELIZABETH NEUFELD. A Recognition Marker Required for Uptake of a Lysosomal Enzyme by Cultured Fibroblasts 55

L. K. DUNICAN and A. B. TIERNEY. Genetic Transfer of Nitrogen Fixation from *Rhizobium trifolii* to *Klebsiella aerogenes* 62

E. HOUGH and D. ROGERS. The Crystal Structure of Ferrimycobactin P, A Growth Factor for the *Mycobacteria* 73

ISAO TOMITA, SHIN-ICHI SAITOU OZAWA, and TATSUO OZAWA. Coenzyme Analogue Inhibition in the Reconstitution of Yeast Pyruvate Decarboxylase and Transketolase 78

FRED C. HARTMAN and MARY H. WELCH. Identification of the Histidyl Residue of Rabbit Muscle Aldolase Alkylated by *N*-Bromoacetylethanolamine Phosphate 85

HANN-PING WANG, D. R. PFIEFFER, TOKUJI KIMURA, and T. T. TEHEN. Phospholipids of Adrenal Cortex Mitochondria and the Steroid Hydroxylases: The Lipid-Environment of Cytochrome P-450 93

FRANK BOWYER and ABBAS E. KITABCHI. Dual Role of Calcium in Steroidogenesis in the Isolated Adrenal Cell of Rat 100

WILLIAM C. KENNEY, DALE E. EDMONDSON, and THOMAS P. SINGER. A Novel Form of Covalently Bound Flavin from Thiamine Dehydrogenase. . . . 106

F. J. VAN DER OUDERAA, W. W. DE JONG, G. W. GROENENDIJK, and H. BLOEMENDAL. Sequence of the first 68 Residues of the αB_2 Chain of Bovine α-Crystallin 112

M. HERBST and P. PIONTEK. Changes of Stiffness of Skeletal Muscle during Latency Relaxation 120

EMMANUEL NUNEZ, GENEVIEVE VALLETTE, CLAUDINE BENASSAYAG and MAX-FERNAND JAYLE. Comparative Study on the Binding of Estrogens by Human and Rat Serum Proteins in Development 126

JEAN DELCOUR and JOHN PAPACONSTANTINOU. A Change in the Stoichiometry of Assembly of Bovine Lens α-Crystallin Subunits in Relation to Cellular Differentiation 134

B. KETTERER, L. CHRISTODOULIDES, G. ENDERBY, and E. TIPPING. Mercapturic Acid Biosynthesis: The Separate Identities of Glutathione-S-Aryl Chloride Transferase and Ligandin 142

PALLE WANG and GRETCHEN BANTLE. The Combined Effect of Glycogen and ATP on the D to I Conversion of Glycogen Synthetase 148

J. K. MARQUIS and H. G. MAUTNER. The Binding of Thiol Reagents to Axonal Membranes: The Effect of Electrical Stimulation 154

CLAUS W. HEIZMANN, DEAN A. MALENCIK and EDMOND H. FISCHER. Generation of Parvalbumin-like Proteins from Troponin 162

KAZUO SHISHIDO and TADAHIKO ANDO. Characterization of *Escherichia coli* RNA Polymerase-Binding Sites on f1 RFI DNA 169

JOSEPH C. BAGSHAW. New Evidence That Release of RNA Polymerase in Isolated Nuclei Requires Transcription 177

S. S. SOFER, D. M. ZIEGLER, and R. P. POPOVICH. Synthesis of *N*-Oxides with a Hepatic Microsomal Drug Oxidase Insolubilized on Artificial Matrices 183

WILLIAM T. BUTLER, EDWARD J. MILLER, JOHN EDWARD FINCH, JR., and TADASHI INAGAMI. Homologous Regions of Collagen α1(I) and α1(II) Chains: Apparent Clustering of Variable and Invariant Amino Acid Residues 190

S. J. BENKOVIC, W. A. FREY, C. B. LIBBY and J. J. VILLAFRANCA. The Role of Tryptophan in Neutral Fructose Diphosphatase 196

CHARLES S. McHENRY and DANIEL V. SANTI. A Sulfhydryl Group Is Not the Covalent Catalyst in the Thymidylate Synthetase Reaction 204

O. GARCIA HERMIDA and J. GÓMEZ-ACEBO. A Different Pattern of Insulin Release in the Perifused Islets of the Rabbit 209

DAVID A. D. PARRY. Structural Studies on the Tropomyosin/Troponin Complex of Vertebrate Skeletal Muscle 216

JEFFREY A. COHLBERG. Activity of Protein-Deficient 30S Ribosomal Subunits in Elongation Factor G-Dependent GTPase 225

PHILLIP NAGLEY, P. L. MOLLOY, H. B. LUKINS, and ANTHONY W. LINNANE. Studies on Mitochondrial Gene Purification using Petite Mutants of Yeast: Characterization of Mutants Enriched in Ribosomal RNA Cistrons 232

TOM ST. JOHN, JERRY D. JOHNSON, and JAMES BONNER. Degradation of Duplex DNA by S_1 Nuclease from *Aspergillus* 240

JOSEPH DeSIMONE, LOIS KLEVE, MARY ANN LONGLEY and JOSEPH SHAEFFER. Rapid Turnover of Newly Synthesized β^S Chains in Reticulocytes from Individuals with Sickle-Cell Trait 248

A. L. VERMA and H. J. BERNSTEIN. Resonance Raman Spectra of Metal-free Porphin and some Porphyrins 255

K. TIMMIS, P. W. EARLY and D. A. MARVIN. Filamentous Bacterial Viruses. IX. Protein Synthesis Inhibitors and DNA Replication. 263

T AOYAGI, J. SUZUKI, K. NEROME, R. NISHIZAWA. T. TAKEUCHI, and H. UMEZAWA. Sialic Acid Residues Exposed on Mammalian Cell Surface: The Effect of Adsorption on Denatured Virus Particles 271

ANNE M. HEACOCK and ELIJAH ADAMS. Hydroxy-L-Proline as a Substrate for Hog Kidney D-Amino Acid Oxidase 279

BALTAZAR REYNAFARJE and ALBERT L. LEHNINGER. The Cause of Superstoichiometric Ca^{2+} Uptake and H^+ Ejection in L1210 Mouse Ascites Tumor Mitochondria 286

J. BERNSOHN and F. J. SPITZ. Linoleic- and Linolenic Acid Dependency of Some Brain Membrane-Bound Enzymes after Lipid Deprivation in Rats. 293

A. R. GLENN. The Effect of Ionic Strength on Alkaline Phosphatase 299

K. MEGYESI, C. R. KAHN, J. ROTH, E. R. FROESCH, R. E. RUMBEL, J. ZAPF, and D. M. NEVILLE, JR. Insulin and Nonsuppressible Insulin-Like Activity (NSILA-s): Evidence for Separate Plasma Membrane Receptor Sites. 307

TSUYOSHI OHNISHI, GREGG S. PRESSMAN and HENRY L. PRICE. A Possible Mechanism of Anesthetic-Induced Myocardial Depression 316

HARRY G. RITTENHOUSE and C. FRED FOX. Concanavalin a Mediated Hemagglutination and Binding Properties of LM Cells. 323

ERRATUM
Volume 56, Number 1, January 7, 1974: Mukund J. Modak, Stuart L. Marcus and Liebe F. Cavalieri, Synthesis of DNA Complementary to AMV RNA Using *E.* coli Polymerase I, pp. 247-255 332

Volume 57, Number 2, March 25, 1974

AUTHOR INDEX, Volume 57, Number 2 ii

DAVID H. COY, ESTHER J. COY, ANDREW V. SCHALLY, JESUS VILCHEZ-MARTINEZ, YOSHIHIRO HIROTSU and AKIRA ARIMURA. Synthesis and Biological Properties of (D-ALA-6, DES-Gly-NH_2-10)-LH-RH Ethylamide, A Peptide with Greatly Enhanced LH- and FSH-Releasing Activity 335

W. S. KISTLER, C. NOYES and R. L. HEINRIKSON. Partial Structural Analysis of a Highly Basic Low Molecular Weight Protein from Rat Testis 341

AGNES ULLMANN. Are Cyclic AMP Effects Related to Real Physiological Phenomena? 348

DOMENICO GERACI, TAMILLA EREMENKO, ROBERTO COCCHIARA, ALDO GRANIERI, EDUARDO SCARANO, and PIETRO VOLPE. Correlation between Synthesis and Methylation of DNA in Hela Cells 353

JAMES M. COLLINS. Template Ability of Activated DNA From the Regenerating Lens 359

MATTEO GIANNATTASIO, ENZA MANDATO, and VINCENZO MACCHIA. Content of 3′,5′ Cyclic AMP and Cyclic AMP Phosphodiesterase in Dormant and Activated Tissues of Jerusalem Artichoke Tubers 365

SANGKOT MARZUKI, RUTH M. HALL, and ANTHONY W. LINNANE. Induction of Respiratory Incompetent Mutants by Unsaturated Fatty Acid Depletion in *Saccharomyces cerevisiae* 372

KNOWLTON POTTER, GILLIAN CHALONER-LARSSON, and HIROSHI YAMAZAKI. Abnormally High Rate of Cyclic AMP Excretion from an *Escherichia coli* Mutant Deficient in Cyclic AMP Receptor Protein 379

D. PARKER SUTTLE and JOANNE M. RAVEL. The Effects of Initiation Factor 3 on the Formation of 30S Initiation Complexes with Synthetic and Natural Messengers 386

TAKAO KANAMORI, TARO HAYAKAWA, and TOSHIHARU NAGATSU. Adenosine 3′,5′-Monophosphate-Dependent Protein Kinase and Amylase Secretion from Rat Parotid Gland 394

S. C. S. CHANG, D. SIKKEMA and E. GOLDWASSER. Evidence for an Erythropoietin Receptor Protein on Rat Bone Marrow Cells 399

JOACHIM SEELIG and ANNA SEELIG. Deuterium Magnetic Resonance Studies of Phospholipid Bilayers 406

HAJIME IWAMURA, TETSUO ITO, ZENZABRO KUMAZAWA, and YUKIYOSHI OGAWA. Anticytokinin Activity of 4-Furfurylamino-7-(β-D-Ribofuranosyl) Pyrrolo [2,3-D] Pyrimidine 412

HILARY ASHE, BRIAN R. CLARK, FRED CHU, DOROTHY N. HARDY, BARBARA C. HALPERN, RICHARD M. HALPERN and ROBERTS A. SMITH. N^5-Methyltetrahydrofolate: Homocysteine Methyltransferase Activity in Extracts from Normal, Malignant and Embryonic Tissue Culture Cells 417

HUBERT E. MAY, RICHARD BOOSE, and DONALD J. REED. Hydroxylation of the Carcinostatic 1-(2-Chloroethyl)-3-Cyclohexyl-1-Nitrosourea (CCNU) by Rat Liver Microsomes 426

CECIL COOPER. The Structure of the Metal-Nucleotide Complex Substrate for Yeast Hexokinase 434

N. A. RUBINSTEIN, J. C. H. CHI, and H. HOLTZER. Actin and Myosin in a Variety of Myogenic and Non-Myogenic Cells 438

JAMES F. RIORDAN and GRAZYNA MUSZYNSKA. Difference between the Conformations of Nitrotyrosyl-248 Carboxypeptidase A in the Crystalline State and in Solution 447

B. J. DOWTY, N. E. BRIGHTWELL, J. L. LASETER, and G. W. GRIFFIN. Dye-Sensitized Photooxidation of Phenanthrene 452

AUTHOR INDEX. Volume 57. 1307

Information for Contributors

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS is devoted to the rapid dissemination of timely and significant observations in the diverse fields of modern experimental biology. Manuscripts submitted should be so written as to clearly emphasize the novel aspects of the information reported, with the understanding that the same material has not been, nor will be, submitted for publication elsewhere.

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover.

To ensure rapid and accurate publication, it is essential that manuscripts conform to the instructions which follow. Manuscripts which are not in accordance with these specifications may be returned.

Preparation of Manuscripts

Article length should not exceed 5 typewritten pages, double-spaced on 8.5 × 11 in. high quality paper (the complete manuscript, including space occupied by figures and tables, should not exceed 8 pages).

Summary. Each article must be preceded by a brief summary, typed single-spaced, not exceeding 10 lines (approximately 100-150 words). This paragraph should adequately summarize the pertinent findings of the paper.

Typing. Articles are reproduced directly from the submitted manuscript as camera-ready copy. Manuscripts must therefore be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used. Special care should be taken to ensure a sharp, clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division and punctuation.

Manuscripts should be double-spaced on one side of the sheet; **references, footnotes and figure legends should be single-spaced.** Typing area of the page must be as close as possible to 6.5 in. wide and 9.5 in. long.

Symbols and Abbreviations defined in the Commission on Biochemical Nomenclature Document No. 1 (*Arch. Biochem. Biophys.* (1966) **115,** 1-12) may be used without definition. Use of all other abbreviations and symbols is to be avoided. When abbreviations are essential, they should be created in accordance with the rules of the NAS-NRC Office of Biochemical Nomenclature and **must be defined in a footnote,** rather than in the text. Such abbreviations **must not** be used in the Summary. The improper use of abbreviations may necessitate the return of manuscripts for retyping, thereby delaying publication.

Enzyme names should not be abbreviated except when the substrate has an approved abbreviation (e.g., ATPase). Use of the Enzyme Commission ("EC") code number is recommended.

Isotopes should be styled following the recommendations of the IUB Commission of Editors of Biochemical Journals. The symbol for the isotope introduced should be placed in square brackets directly attached to the front of the name (e.g., [^{32}P]CMP). Note that the isotope number should only be used as a (superior) prefix to the atomic symbol, not to an abbreviation.

For further information regarding nomenclature authors are advised to consult the Instructions to Authors of the *Archives of Biochemistry and Biophysics* (1973) **154,** iii-xii. Reprints are available from the Publisher.

Footnotes should be typed single-spaced at the foot of the page on which they are mentioned in the text. References and figure legends should be typed single-spaced on separate pages.

Illustrations and Tables. **Do not attempt to insert figures, figure legends or tables into the text.** This will be done by the Publisher.

All drawings should be done with a mechanical lettering set (e.g., Leroy; lettering size 120 or 140) and black ink. Do not use press-on lettering; typewritten lettering is not acceptable.

Figures will be reduced to fit within the type area of the page (approximately 5×8 in.); the original drawings must be planned accordingly.

Glossy photographs of drawings are acceptable provided they are sharp, clear prints with an even *black* density.

Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink.

Illustrations and tables should be submitted on separate sheets.

Page Numbers and Headings. Page numbers should be typed at the top of the page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

References to the literature should be cited by the number in parentheses in the text and listed in numerical order in a single-spaced typed list placed at the end of the manuscript. Abbreviations of journals should conform to those of *Chemical Abstracts Service Source Index, 1969.* Note the following examples.

For a journal article:

1. Chattoraj, D. K., and Bull, H. B. (1971) Arch. Biochem. Biophys. 142, 363-370.

For a book by one or more authors:

2. Robison, G. A., Sutherland, E. W., and Butcher, E. (1971) Cyclic AMP, pp. 298-302, Academic Press, New York.

Note that inclusive pagination must be given.

Mailing. To avoid creasing, please place manuscripts between cardboards when mailing.

Acknowledgment of Receipt. Authors desiring acknowledgment of receipt of manuscript should enclose a stamped self-addressed card.

Reprints. Reprint order forms are sent to the authors immediately upon acceptance of their manuscript. The price list is included.
